

DUO CLAMPING MACHINE: EPOXY

Technical data and equipment	
Material	➤ Epoxy resin ➤ Polyurethane
Clamping surface	max. 1200 x 1200 mm
Closing force	max. 600 kN
Number of closing cylinders	2
Closing stroke	Up to 1600 mm
Incline	X/Y-direction (optionally)
Closing mechanism	Pulling – hydraulically
Opening width	Up to 2000 mm, accessible from both sides
Heating plates	Available
Core puller	Top, bottom
Number of cavities	1 - 4 per mould (two moulds per clamping machine)
Max. mould weight	3000 kg per mould half
Casting heads	Bottom
Handling systems/transport	➤ Roll-in/roll-out ➤ Robot ➤ Hoist
Safety devices	➤ Guard rails/fences ➤ Laser scanner ➤ Laser barrier
Weight	16 t
Total dimensions (L x W x H)	5100 x 2500 x 4110 mm

Post insulators

Switchgears
10 - 35 kV

Instrument transformers
10 - 35 kV
